 $\succ$

A diagram showing a horizontal sequence of 16 rectangular boxes, each representing a bit. The boxes are arranged in two rows of eight. The first five boxes in the top row are connected by a horizontal line, as are the last five boxes in the top row. Similarly, the first five boxes in the bottom row are connected, as are the last five boxes in the bottom row. There is a gap between the fifth and sixth boxes in both rows, and a larger gap between the tenth and eleventh boxes, indicating a segmented or multi-ported bus structure.
